

REMOTE WATER TREATMENT SERVICES

# PREVENTATIVE MAINTENANCE

# PREVENTATIVE MAINTENANCE

---

## **GIVE YOUR EQUIPMENT THE TREATMENT IT DESERVES WITH GREATER PRODUCTIVITY AND LESS DOWNTIME.**

Servicing and feeding your wastewater infrastructure regularly will ensure its lifelong protection and sustainability. Remote Water Treatment Services' experienced maintenance and operations division can provide just that - proactive support to optimise the performance of your investment.

RWTS understands that potable water treatment is not without its risks. Our NATA accredited technicians can ensure that your water treatment system is designed and operating to the highest standard, guaranteeing the quality of treated effluent and, most importantly, the safety of those utilising the water supply. Through an extensive site audit, including a full assessment of the design, overall hardware status, site operating conditions and operational experience of maintenance personnel, RWTS will pin-point the underlying cause of any operational problems and devise a tailored solution to rectify issues and maximise productivity.

At Remote Water Treatment Services, we are committed to the compliance of all systems with relevant regulations and legislation, including the Australian Drinking Water Guidelines, to provide you with peace of mind. RWTS Preventative Maintenance provides added assurance that your asset is regularly monitored and serviced to void any expensive environmental or safety violations.

If you're seeking quality servicing to ensure your water treatment system lasts a lifetime, RWTS offers a range of Scheduled Maintenance Agreements to suit the needs of our diverse clientele.

**Call us on 1300 787 719 to discuss your options for ongoing maintenance or organise a service health check on your plant today.**

# SYSTEM REFURBISHMENT

Don't need a complete turnkey system but considering a refurbishment? Let RWTS breathe life into your existing water treatment plant with a personalised solution, optimised for your unique site requirements. Working closely with experienced environmental engineers, our qualified technicians will refurbish your existing plant whilst ensuring that relevant council environmental approvals are secured and site compliance is upheld.

# ONLINE REPORTING

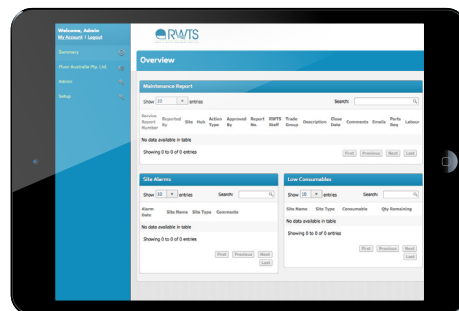

## PROVIDING REAL-TIME ONLINE REPORTING FOR THE UPMOST CONVENIENCE & TRANSPARENCY

The RWTS online reporting system is designed to keep you up-to-date with the performance of your potable, sewage and irrigation water services from wherever you may be. Including in-depth live daily, weekly, monthly and yearly analysis reports, rest assured that your system is being closely and accurately monitored. Our customisable online reporting system eliminates the risk, cost and time constraints associated with delivering tedious spreadsheet reports.

### FEATURES

- Irrigation field monitoring
- Sewage treatment flow analysis
- Plant performance review
- Bore consumption analysis
- Chemical consumption monitoring

## EMERGENCY SUPPORT

At RWTS we understand the challenges of supporting and maintaining water and wastewater treatment infrastructure. Our emergency breakdown and support crew are quick to respond, providing 24-hour emergency response services and ongoing support to ensure consistent, reliable operation and optimal performance of your water treatment systems.
